SUMMARY

Backend Developer and undergraduate student in Information Systems at UFMG with around 1 year of experience. I have a strong interest in technology and programming, particularly in the field of Cybersecurity, developing safe and efficient systems using modern tools and concepts such as Git, Nest.js, Prisma, Next.js, and Object-Oriented Programming(OOP). This includes developing CRUD operations in RESTful APIs, control of critical bugs in production environment, and refactoring and improvement of legacy systems to the most updated market standards in performance. Improving processes, bug hunting and backend development are skills I have been developing for the past 4 years. Team player, I care about correct structure of development by assertive communication with the team to ensure team efficiency and well-being on the workspace.

SKILLS

Proficient: Python, Git, Software Engineering

Intermediate: OOP, Clean Code, Typescript, Next.js, React

Beginner: Nest.js, Prisma, PostgreSQL, Insomnia, Node.js, Java, C
